5★ SERVICE WITH ROL CRUISE

**'EASIEST AND FRIENDLIEST WAY
TO BOOK A CRUISE HOLIDAY'**

When I talk to ROL, it is more like talking to a friend than a sales person. I have used them many times and it feels like we have a personal relationship. They know what I want to do and always have all the information I need. I already recommend them to my friends and will continue to do so.

'A LIGHT IN THESE GLOOMY TIMES!'

Very well organised, very friendly and very helpful. I've used before and will certainly again.

'TIP TOP TEAM!'

I always find the service at Team ROL to be excellent. Even when you have probably insignificant questions, (that are so important to you, as you've maybe spent a small fortune) they are patient, diligent and so pleasant. Going the extra mile is the norm, I have yet to be disappointed with their service and happily recommend this company to all interested in cruising.

'BEST TRAVEL AGENCY OUT THERE'

As always, the service that I received from ROL Cruise was excellent. The staff are so good at what they do, friendly, knowledgeable and helpful. I would recommend ROL to anyone thinking of booking a holiday.

DO YOU HAVE A FUTURE CRUISE CREDIT?

At the moment we all need something to look forward to. Using your Future Cruise Credit to book your next adventure will brighten your days no end. Much like a voucher, your Future Cruise Credit has a monetary amount associated to it which can be used towards the fare of a future cruise. So why not take advantage of your Future Cruise Credit and book your next adventure today?

Your Galápagos Wildlife Watchlist...

Access to the Experts

On this sailing you will be accompanied by highly qualified naturalist guides, who will share with you their deep knowledge of the Galápagos archipelago. Together, you will explore each island, trekking over black lava rocks where marine iguanas sun themselves, to see Galápagos tortoises, sea turtles and the iconic blue-footed Boobies.

MARINE IGUANA

Found only in the Galápagos Islands, the iconic Marine Iguanas are distinguishable by the white "wigs" of salt expelled from glands near their noses. They look fierce, but are actually gentle herbivores, surviving exclusively on underwater algae and seaweed. Their short snouts and razorsharp teeth help them scrape algae off rocks.

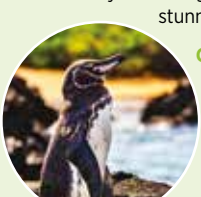

SALLY LIGHTFOOT CRAB

The brightly coloured Sally Lightfoot crab is a common sight along the shores and beaches of most of the Galápagos Islands. They are rumoured to have been named after a Caribbean dancer, due to their extreme agility, jumping from rock to rock. They're striking colours make for a stunning appearance too.

GALÁPAGOS SEA LION

The cute Galápagos Sea Lion is the most abundant marine mammal in the archipelago and is often seen sleeping on the beaches or swimming close to shore. Their streamlined bodies make them very efficient swimmers and hunters, especially of sardines. If you're lucky, you may get the chance to witness young pups chasing each other along the sand.

GALÁPAGOS PENGUIN

The Galápagos penguin is one of the smallest penguins in the world and is endemic to the Galápagos Islands. It is the most northerly occurring penguin species, nesting entirely in the tropics, with some colonies living on the northern tip of Isabela

in the Northern Hemisphere. They are closely related to the African, Humboldt and Magellanic penguins – all of which are burrow-dwelling. As there is no soft peat in which to burrow on the Galápagos Islands, Galapagos penguins instead live in caves and crevices in the coastal lava.

GALÁPAGOS GREEN TURTLE

The Galápagos green turtle is only commonly seen in a few places in the world, including the Galápagos. They are the only species of sea turtle to nest in Galápagos, with some females returning several times to lay their eggs, and are also the most common species sighted. They live in the tropical and sub-tropical waters around the Pacific islands, differing from other marine turtles by their serrated lower jaw and a single pair of scales covering their eyes.

- Day 3 **Quito, Ecuador**

Black Turtle Cove, Santa Cruz Island (pm)
A zodiac ride into Black Turtle Cove brings you up close to the quiet wonders of the Galapagos. Once inside the cove, you'll explore the area looking for sea turtles, several species of rays and sharks
- Day 4 **Sullivan Bay, Santiago Island** (am)
Bartolomé Island, Galápagos Islands (pm)
Bartolomé Island hosts one of the region's most often-photographed views and a spectacular geologic setting. Its barren moon-like volcanic landscapes, spatter cones, and pinnacle rock make for a unique stop. It is also home to the endemic Galápagos penguin and provides an excellent opportunity for snorkelling
- Day 5 **Urvina Bay, Isabela Island** (am)
Composed of five coalesced volcanoes, Isabela is the largest island in the Galápagos and the most recently active. Here you will see large land iguanas, finches, and if you're lucky, a giant tortoise or two. In 1954, the intrusion of magma below one of the island's volcanoes caused part of the bay to be uplifted some six metres, and today you can walk through the remains of what was once a thriving underwater reef
Tagus Cove, Isabela Island (pm)
Historically an anchorage for pirates and whalers, this site offers a breathtaking view of Isabela, its volcanoes and spectacular Darwin Lake. Along the shore, seabirds, penguins, sea lions, sea turtles, and nesting flightless cormorants can often be found
- Day 6 **Espinoza Point, Fernandina Island** (am)
Fernandina is the youngest island in the Galápagos and, as Darwin wrote, it is "covered with immense deluges of black naked lava." Along with its extraordinary black-lava rocks, this point of land hosts the largest colony of marine iguanas in the Archipelago, along with sea lions and a nesting site for flightless cormorants
Vicente Roca Point, Isabela Island (pm)
The half-collapsed remains of an ancient volcano make for a spectacular setting at this site. Awe-inspiring cliffs, blue waters, and wildlife create a zodiac ride to remember as you search for sea turtles, penguins, fur seals, the flightless cormorant, marine iguanas, marine mammals, and the oddly shaped form of the elusive sunfish
- Day 7 **Egas Port, Santiago Island** (am)
With its black sand beach, coastal tide pools, and blue-water grottoes, this stop offers a wonderful taste of the Galápagos and the opportunity to see shore birds, Galápagos Hawks, marine iguanas, and Galápagos fur seals. Sea lions, colourful tropical fish and sea turtles are often seen while snorkelling
Espumilla Beach, Santiago Island (pm)
- Day 8 **Puerto Ayora, Santa Cruz Island**
This is the main population centre of the islands, and home to the National Park Service tortoise-breeding centre and the Charles Darwin Research Station. You will be able to visit the tortoise-breeding centre and walk through the Charles Darwin Research Station
- Day 9 **El Barranco, Genovesa Island** (am)
El Barranco, also known as Prince Philip's Steps after the prince who visited in 1965 and again in 1981, is a steep stairway that leads up through a seabird colony full of Nazca and red-footed boobies. Once visitors reach the plateau, the trail continues inland and passes more nesting booby colonies in the thin Palo Santo forest

Darwin Bay, Genovesa Island (pm)

Darwin Bay's soft white sand is only the beginning of a spectacular excursion. A trail from the beach takes you into lush mangroves where red-footed boobies nest. Other local wildlife includes sea lions, swallow-tailed gulls, frigate birds, and more. Snorkelling is a must here, as the nutrient-rich water attracts all types of marine life, including sharks, sea lions, sea turtles, and the occasional manta ray

★ WILDLIFE WATCH LIST ★

The Amazon rainforest contains vast array of species and is home to some of the world's most unique wildlife.

SLOTH

The Sloth is the iconic sluggish tree dweller of South America, moving through the canopy at a rate of approximately 35 metres a day. They are solitary by nature and tend to sleep for about 15-20 hours each day.

AMAZON RIVER DOLPHIN

The Amazon river dolphin is unique as it lives only in freshwater and interestingly, the males can be pink. The brighter the pink the more attractive the males are deemed to be. They are featured in traditional Amazonian folklore, as being able to take the form of a human and come ashore. Wearing a hat to hide its distinctive blowhole.

SQUIRREL MONKEY

These monkeys are aptly named as they are both small and agile and spend a large portion of their life in trees. They prefer to live in large groups, and sometimes can be found in groups as large as 500.
